

## UNION ELEMENTARY SCHOOL

The new K-8 Union Elementary School is a state of the art High Performance school building.

The building is approximately 20,000 square feet and had a construction budget of \$4.9 million. The school includes a highly efficient building envelope, designed acoustics, displacement ventilation, CO2 monitoring, heat recovery, motion sensors, and sustainable materials.

The heart of the school is the patented “Advantage Classroom” design, which is the model for healthy learning environments in many Turner Group projects.

The project was completed in August 2010.

**Scope of Work:** New Construction - Educational

**Location:** Union, Connecticut
