

Lesson 4 (STE402-04E) M&V Process

COMMISSIONING TECHNICAL TRAINING PROGRAM

Owner: Portland Energy
Conservation, Inc.

Scope of Work:
Commissioning
Consultant

Turner Building Science & Design worked with Portland Energy Conservation, INC as a consultant by providing a series of eleven commissioning technical training program presentations aimed at teach engineers, and other qualified candidates, the technical knowledge and skills required to conduct commissioning activities in order to optimize the performance of new and existing commercial buildings. The Program consisted of the development of approximately 140 hours of instruction presented through high quality Microsoft PowerPoint instructional presentations that addressed the following topics and learning objectives:

- Domestic Water
- Electrical Systems
- Building Control Systems
- Process Equipment
- Analysis of Process & Results
- Implementation of Cost & Benefits
- Report Development
- M&V Process
- M&V Plan Development
- M&V Plan Implementation
